KABELO PETER MATLAKALA

LinkedIn: Kabelo (Peter) Matlakala
GitHub: github.com/kpmatlakala
Email: matlakalakabelo1@gmail.com
Mobile: +27 72 713 8367

Analytical and detail-oriented graduate with a BSc in Mathematical Science and hands-on experience in software development and Agile collaboration. Skilled in team coordination, project support, and technical communication. Passionate about data-driven problem-solving and continuous learning.

EDUCATION

- **University of Limpopo Polokwane** 2016 - 2024
  BSc in Mathematical Science (Computer Science & Applied Mathematics)
- **mLab CodeTribe Academy** March 2024 - March 2025
  Software Development Learnership (Full-Stack) Polokwane, South Africa
- **Power Learn Project (PLP) Academy** July 2025
  AI for Software Engineering (Python) - Fully-Funded Scholarship Remote

SKILLS SUMMARY

- **Languages**: JavaScript (ES6+), Python, C#, Kotlin, SQL, HTML5, CSS3, Java, C++
- **Frameworks**: React, Next.js, Node.js, Express.js, Django, React Native, .NET
- **Tools**: Git, GitHub, Docker, VS Code, Android Studio, Figma, Postman, Firebase, Unity
- **Databases**: MongoDB, MySQL, PostgreSQL, Firebase, SQL Server, SSMS
- **Platforms**: GitHub Actions, Vercel, Netlify, Render, AWS basics
- **Soft Skills**: Agile & Scrum methodologies, UI/UX Design, Problem-solving, Team collaboration

CERTIFICATES

AI Literacy Programme **Otermans Institute** **Oct 2025**

- Gained foundational understanding of AI concepts, tools, and responsible digital practices
- Completed interactive exercises and assessments demonstrating AI knowledge and practical application

AI for Software Engineering (Python) **Power Learn Project** **July 2025**

- Completed intensive program covering Python, Django, and ML with scikit-learn, pandas, and NumPy
- Developed end-to-end ML applications and interactive Streamlit dashboards

Software Development Learnership **mLab CodeTribe Academy** **March 2025**

- Mastered full-stack JavaScript development including React, Node.js, Express, and database integration
- Practiced Agile methodologies and Git-based collaborative workflows

PROFESSIONAL EXPERIENCE

HACKATHON COACH/MENTOR **Limpopo Varsity Hackathon 2025**
October 2025 *Polokwane, South Africa*

- Guided student teams over a 3-day hackathon, providing mentorship on problem-solving, coding, and project presentation

SOFTWARE DEVELOPER TRAINEE **mLab CodeTribe Academy**
March 2024 - March 2025 Polokwane, South Africa

- Built 8+ full-stack web and mobile applications using MERN stack
- Developed secure RESTful APIs integrated with MySQL, MongoDB, Firebase, and Supabase databases
- Collaborated in Agile teams and contributed to Scrum events

COMPUTER LABORATORY STUDENT ASSISTANT **University of Limpopo - ICT**
July 2022 - December 2022 Polokwane, South Africa

- Provided comprehensive technical support to 100+ students and faculty, resolving hardware, software, and network issues across Windows OS and academic applications
- Delivered one-on-one technical guidance that improved student productivity and system proficiency by 85% based on post-support feedback surveys

VOLUNTEER MENTOR **Eskom Expo for Young Scientists**
2019 Polokwane, South Africa

- Mentored 3+ student groups in science and technology projects, with 2 advancing to provincial competition
- Supported research methodology, prototyping, and presentation skills development

PROJECTS

- **Limpopo Connexion - Asset Management system**
  Collaborated on the development of Limpopo Connexion Asset Management System, implementing frontend and backend features with Next.js, React Native, Node.js, and Supabase to enable secure, real-time asset tracking.

- **AI For Software Engineering Sandbox And Mastery AI Toolkit**
  - Developed end-to-end AI and data science solutions, including preprocessing, ML/NLP, time series forecasting, and model deployment.
  - Built interactive Streamlit dashboards and demos (Iris classifier, MNIST, text-based AI tasks).
  - Worked with Python, scikit-learn, TensorFlow, PyTorch, spaCy, and Jupyter/Colab, emphasizing practical AI engineering and collaborative development.

  Developed and contributed to 10+ AI and data science repositories, including end-to-end ML pipelines, AI ethics exploration, health analytics, and intelligent solutions using Python, Jupyter Notebook, and Streamlit.
